

## EDUCATION

---

- **Siberian State University of Telecommunications and Information Sciences** Novosibirsk, Russia  
*M.S., Computer Science and Computer Engineering (Computers, complexes, systems and networks)* Sep 2016 — Jun 2018
- **Siberian State University of Telecommunications and Information Sciences** Novosibirsk, Russia  
*B.S., Computer Science and Computer Engineering (Computers, complexes, systems and networks)* Sep 2012 — Jun 2016

## EXPERIENCE

---

- **Center of Financial Technologies** Novosibirsk, Russia  
*Software Developer / Software Designer* Aug 2019 — Current
  - **AML:** The Anti-Money Laundering system designed to predict customer behavior and identify suspicious transactions in banks. The project has a microservices-based architecture and intended to work with big data under high load. I took part in designing new product features, engaged in research activities, developed different components of the system. Contributed to configuration files for online-monitoring service in such banks as Gazprom, Uralsib, Vesta etc. Contributed to local wiki to improve knowledge base of the system. Involved in troubleshooting, code refactoring, code & unit tests reviews, staff trainings and many other things. Here I also got my first remote work and business trips experience.

Kotlin

Java

Python

Spring

JUnit/MockK

PostgreSQL

ArangoDB

ClickHouse

Docker

Git
- **Eltex Enterprise Ltd** Novosibirsk, Russia  
*Embedded Software Engineer* Jan 2019 — Aug 2019
  - **ME5K:** Worked on multifunction devices designed for use as aggregating routers of the IP/MPLS transport network boundary. I implemented a service that installs routes into Linux environment via netlink sockets and added logic of their synchronization with a backup-board (fault tolerance support). I created a utility for file system modification check and error recovery control. I also took responsibility for supporting a resource management service written in Python, when its creator leave the project.

C

Python

Docker

Git

SQLite

Linux

TCP/IP
- **Siberian State University of Telecommunications and Information Sciences** Novosibirsk, Russia  
*Teacher Assistant* Feb 2018 — Jun 2018
  - **Pedagogical practice:** I gave to students fundamental knowledge of how to work in Linux environment, use main Linux commands and write basic shell scripts. I also provided the information about Linux internals and briefly talked about device drivers, IPC, I/O devices, memory management, networking etc.
- **Friday's Games** Novosibirsk, Russia  
*Intern / Jr. C++ Developer* Oct 2017 — Dec 2017
  - **Farmscapes:** Three in a Row "Gardenscapes"-like game. During the internship I got my first teamworking experience, learned basics of C++ programming and OOP principles. My responsibilities was UI & map editor enhancements.

## KEY SKILLS

---

- **Information Technology:** Algorithms, Data Structures, Microservices, Multithreading, Object-Oriented Programming, Software Development, Unit Testing
- **Programming Languages:** Kotlin, C, Java, Python
- **Databases:** PostgreSQL, ArangoDB, ClickHouse
- **Frameworks:** Spring (Boot, Cloud, Data, Web), JUnit/MockK
- **Infrastructure:** Docker, Git, Linux, REST, TCP/IP

## LANGUAGES

---

Russian (Native), English (B1/B2 - Intermediate)
